Samajh post-sale feedback review

Namoona Bank (synthetic)

SYNTHETIC Synthetic batch: the loan book and the customers are synthetic. Calls marked Simulated were scripted; calls marked Phone call were made on the browser phone with synthetic records.

Calls marked Phone call were made on the browser phone against synthetic records: 7 phone session(s), 0 with customer audio from the microphone only, 0 from prepared audio files only, 0 from both, 0 with no customer audio, 7 where it is not recorded, or not readable, in the case file. None of them is a call with a real customer of a lender.

Demo limitation: these pages have no sign-in. Anyone who can reach this server can record a decision, and the reviewer's name is free text that nobody checks.

FEEDBACK UNDER PARA 85Y

Half-yearly report: Namoona Bank (synthetic)

1 January 2027 to 30 June 2027

This batch covers 9 draw(s) made between 11 January 2027 and 8 March 2027: 80 of the 200 loans on the book (sold 4 January 2027 to 4 March 2027) were sampled.

As of 9 Mar 2027 (synthetic date) · batch B-2027H1-ec2bdb3e

Synthetic batch: the loan book and the customers are synthetic. Calls marked Simulated were scripted; calls marked Phone call were made on the browser phone with synthetic records.

Sold in the period	Sampled	Completed within 30 days	Referred	Understanding gap	Most common gap
200	80	64	7	33	**Cover amount** 20 calls

What this report is and is not

Synthetic batch: the loan book and the customers are synthetic. Calls marked Simulated were scripted; calls marked Phone call were made on the browser phone with synthetic records.

- The loan book and the customers on it are synthetic. Every phone call was made against a synthetic record, so no real lender and no customer of a lender is behind any number here.
- 113 attempt(s) in this batch were simulated: their outcome and any customer reply were scripted from phrase banks, as text only, with no speech recorded or transcribed. 7 call(s) were phone sessions on the browser phone (0 attempt(s) in the sample and 7 call(s) outside it): their customer turns were read by Gnani Prisma speech-to-text (each case file names the model) from the customer audio the next note counts.
- Calls marked Phone call were made on the browser phone against synthetic records: 7 phone session(s), 0 with customer audio from the microphone only, 0 from prepared audio files only, 0 from both, 0 with no customer audio, 7 where it is not recorded, or not readable, in the case file. None of them is a call with a real customer of a lender.
- The share of calls flagged under each rule follows from the mix of customers the simulation assumes and, for phone calls, from what was said on the browser phone against synthetic records. It says nothing about any real lender.
- Each interval is a 95% Wilson interval for sampling among eligible sales only (sales a draw covered). It does not cover sales no draw covered, errors in reading the call, or customers who were not reached.
- The flag counts describe customers who completed the call. Customers who did not answer, declined or ended the call early may differ.
- A referral is a request for a person to look at one call, and nothing more.
- Reviewer decisions are counted, not estimated: they are one reviewer's view of the file, and no interval is given for them.

Synthetic date: the report is dated by the simulated book's clock, the day of the last call attempt.

The mechanism

Run by	Customer Feedback Unit (synthetic), not associated with sales
Calls read by	• Simulated (scripted transcript), read by scripted extraction, no model: 64 calls
Previous period	No previous period
Phone calls outside the sample	7 (listed on the attempt log, not counted here)
Phone sessions not brought in	The last ingest saw 41 phone session(s) and did not bring in 34: they are in no count here, not even the reach figures. 0 came in as attempts and 7 as calls outside the sample. Each session left out is listed on the attempt log with the reason.

Sampling

200 sales were made in the period. 200 were eligible (a draw covered them) and 80 were sampled. 0 were never eligible.
Each draw took 40% of the sales made since the previous draw that were still within 30 days of the sale, so draw windows never overlap. Every eligible sale had about the same chance of being sampled: between 37.5% and 41.7% (the highest is 1.11 times the lowest, within the 1.25 this report allows). Shares and intervals describe the 200 eligible sales only. The 0 sale(s) in the period that no draw covered are not represented.
Shares are unweighted: with chances this close, weighting would move a share by at most 5.6% of the difference between the groups it mixes and widen an interval by under 1%.

Draws

Draw	As of	Sales covered	Share taken	Eligible	Drawn	Chance of being drawn	Seed	Recomputed and matched
D-2027-01-11	11 Jan 2027	sold 0 to 30 days before	40%	17	7	7 of 17 (41.2%)	85	Yes
D-2027-01-18	18 Jan 2027	sold after 11 Jan 2027 and 0 to 30 days before	40%	34	14	14 of 34 (41.2%)	85	Yes
D-2027-01-25	25 Jan 2027	sold after 18 Jan 2027 and 0 to 30 days before	40%	22	9	9 of 22 (40.9%)	85	Yes
D-2027-02-01	1 Feb 2027	sold after 25 Jan 2027 and 0 to 30 days before	40%	21	8	8 of 21 (38.1%)	85	Yes
D-2027-02-08	8 Feb 2027	sold after 1 Feb 2027 and 0 to 30 days before	40%	27	11	11 of 27 (40.7%)	85	Yes
D-2027-02-15	15 Feb 2027	sold after 8 Feb 2027 and 0 to 30 days before	40%	24	10	10 of 24 (41.7%)	85	Yes
D-2027-02-22	22 Feb 2027	sold after 15 Feb 2027 and 0 to 30 days before	40%	31	12	12 of 31 (38.7%)	85	Yes
D-2027-03-01	1 Mar 2027	sold after 22 Feb 2027 and 0 to 30 days before	40%	16	6	6 of 16 (37.5%)	85	Yes
D-2027-03-08	8 Mar 2027	sold after 1 Mar 2027 and 0 to 30 days before	40%	8	3	3 of 8 (37.5%)	85	Yes

Reach

113 attempts were made on 80 sampled loans, retries included. No attempt was made after day 30 from the sale. Every share below is of the 80 sampled loans.

How far the sampled loans got. Each stage is within the one before.

Stage	Count	Share	95% interval
Attempted	80 of 80	100%	95 to 100%
Answered the phone	78 of 80	98%	91 to 99%
Right person confirmed	69 of 80	86%	77 to 92%
Completed the call within 30 days of the sale	64 of 80	80%	70 to 87%

Where the loans without a completed call ended

Final status	Count	Share	95% interval
Not attempted yet	0 of 80	0%	0 to 5%
Not reached	2 of 80	3%	1 to 9%
Someone else answered	5 of 80	6%	3 to 14%
Identity not confirmed	1 of 80	1%	0 to 7%
Declined the call	5 of 80	6%	3 to 14%
Asked to be called later, not yet called	0 of 80	0%	0 to 5%
Asked for another language, not yet called in it	0 of 80	0%	0 to 5%
Request from a speaker not confirmed as the borrower (no call after it)	0 of 80	0%	0 to 5%
Not reached within 30 days of the sale	0 of 80	0%	0 to 5%
Call ended early	3 of 80	4%	1 to 10%
Asked not to be called again (no further attempt)	0 of 80	0%	0 to 5%
Asked for this in writing instead (no further attempt)	0 of 80	0%	0 to 5%
Completed, but the call could not be analysed (no flags raised)	0 of 80	0%	0 to 5%
Completed after day 30 from the sale (not in the counted calls)	0 of 80	0%	0 to 5%

Timing

Days are counted from the sale to the attempt, not to the draw. No attempt was made after day 30 from the sale.

Timing against the 30-day window

Measure	Value
Days from sale to first attempt, over the 80 loans attempted	least 0, median 3, most 7
Attempts made after day 30 from the sale	0 of 113
Calls completed after day 30 (shown apart, not in the counted calls)	0

Outcome of the counted calls

One outcome per call completed within 30 days of the sale

Outcome	Count	Share	95% interval
Referred for review	7 of 64	11%	5 to 21%
Incomplete	3 of 64	5%	2 to 13%
Understanding gap (report only)	33 of 64	52%	40 to 63%
Nothing to refer	21 of 64	33%	23 to 45%

Flags by rule: features and risks

para 85Y asks that this feedback be used to review product features and risks. Each rule runs on every counted call. Undecided calls had a gap under the rule and no flag. Referred is the number of the flagged calls that went to a reviewer for that rule. Understanding-gap calls are counted calls whose outcome is an understanding gap, with a gap under the rule; the rule with the most is the most common gap at the top of the page.

> Risk coverage is thin. One question in the call bears directly on risk: whether the customer can get the money back (any time, after a period, or with a return), which shows what they believe happens to the money. Describing the product as a deposit also bears on it. The call asks nothing about exclusions, claim conditions or what happens to the cover if the loan is closed early.

Seriousness is the builders' ranking, not a regulatory scale: a belief about what the product is, whether it returns money, or how it was agreed to ranks above forgetting a figure.

A paragraph is one that a line may engage. It is not a conclusion about any sale.

Customers who…	Seriousness	Count	Share	95% interval	Undecided	Referred, of those counted	Understanding-gap calls	Previous period	Paragraph
Product features: what it is, what it costs and covers, how long it runs, how to cancel									
did not describe the product as what the record shows What the product is	Serious	1 of 64	2%	0 to 8%	0 of 64	1 of 1	0	None	may engage para 85Y
named a product that is not on the record A product named that is not on the record	Serious	0 of 64	0%	0 to 6%	0 of 64	0 of 0	0	None	may engage para 85Y
could not state the cancellation window on the record Cancellation window	Moderate	18 of 64	28%	19 to 40%	0 of 64	0 of 18	17	None	may engage para 85Y
did not state the premium on the record What it cost	Moderate	5 of 64	8%	3 to 17%	0 of 64	0 of 5	4	None	may engage para 85Y
did not state the cover amount on the record Cover amount	Lower	21 of 64	33%	23 to 45%	0 of 64	0 of 21	20	None	may engage para 85Y
did not state the term on the record How long it runs	Lower	15 of 64	23%	15 to 35%	0 of 64	0 of 15	14	None	may engage para 85Y
did not name the product before it was mentioned Naming the product unprompted	Lower	5 of 64	8%	3 to 17%	0 of 64	0 of 5	4	None	may engage para 85Y
Risks: what the customer believes happens to the money									
held a belief about the product that its features on the record do not support Beliefs about the product's features	Serious	2 of 64	3%	1 to 11%	0 of 64	1 of 2	0	None	may engage para 4(20A)(ii)
How the product was sold: consent, payment from the loan, bundling, conduct									
did not know the premium was deducted from the loan, or the record shows a deduction with no consent Premium deducted from the loan	Serious	3 of 64	5%	2 to 13%	0 of 64	3 of 3	0	None	may engage para 85W
gave an account of agreeing that does not match the record, or the record holds no consent Consent	Serious	2 of 64	3%	1 to 11%	3 of 64	2 of 2	0	None	may engage para 85G
had a product required for the loan with a question over the choice of provider or what the product is Required for the loan	Serious	1 of 64	2%	0 to 8%	1 of 64	1 of 1	0	None	may engage para 85V
voiced a concern about how the product was sold How the sale was handled	Serious	1 of 64	2%	0 to 8%	0 of 64	1 of 1	0	None	—

Referrals and reviewer decisions

These are counts of one reviewer's decisions on each referred call, not estimates, so no interval is given.

Counted referrals by the reviewer's latest decision

Decision	Count
Concern supported by the file (reviewer's view)	2 of 7
Concern not supported by the file (reviewer's view)	1 of 7
Call the customer	1 of 7
Needs more information	0 of 7
No decision recorded yet	3 of 7

4 of 7 counted referrals are open (no final decision yet). Of the 3 with a final decision, 2 were marked "Concern supported by the file (reviewer's view)". 4 further referred call(s) outside the sample or the window are in the reviewer queue and not counted here.

Referrals and understanding gaps by loan kind, branch and channel

Each row's shares are of its own counted calls, set against every other row together. Small rows give wide intervals; overlapping intervals show no clear difference.

By loan type, against the rest

Loan type	Counted calls	Referred	Rest: referred	Understanding gap	Rest: gap
Gold loan	29 of 35 sampled	3 of 29 (10%) 95% interval 4 to 26%	4 of 35 (11%) 95% interval 5 to 26%	14 of 29 (48%) 95% interval 31 to 66%	19 of 35 (54%) 95% interval 38 to 70%
Personal loan	35 of 45 sampled	4 of 35 (11%) 95% interval 5 to 26%	3 of 29 (10%) 95% interval 4 to 26%	19 of 35 (54%) 95% interval 38 to 70%	14 of 29 (48%) 95% interval 31 to 66%

For policy review

Under para 85Y this report is used to review policies and product features and risks. Each rule with flagged calls is listed most serious first, then most common. The action, owner and review date are left for the policy review to fill in.

1. **Serious: 3 of 64 customers who completed the call did not know the premium was deducted from the loan, or the record shows a deduction with no consent**

   3 of 64, 5%; 95% interval 2 to 13%; highest at branch SYN-BR-02: 2 of 10 counted calls (95% interval 6% to 51%), against 1 of 54 at the other branches (95% interval 0% to 10%).

Action	*To be filled in by the policy review*
Owner	*To be filled in by the policy review*
Review date	*To be filled in by the policy review*
Previous period	No previous period

2. **Serious: 2 of 64 customers who completed the call held a belief about the product that its features on the record do not support**

   2 of 64, 3%; 95% interval 1 to 11%; highest at branch SYN-BR-03: 1 of 11 counted calls (95% interval 2% to 38%), against 1 of 53 at the other branches (95% interval 0% to 10%).

Action	*To be filled in by the policy review*
Owner	*To be filled in by the policy review*
Review date	*To be filled in by the policy review*
Previous period	No previous period

3. **Serious: 2 of 64 customers who completed the call gave an account of agreeing that does not match the record, or the record holds no consent**

   2 of 64, 3%; 95% interval 1 to 11%; highest at branch SYN-BR-06: 1 of 7 counted calls (95% interval 3% to 51%), against 1 of 57 at the other branches (95% interval 0% to 9%).

Action	*To be filled in by the policy review*
Owner	*To be filled in by the policy review*
Review date	*To be filled in by the policy review*
Previous period	No previous period

4. **Serious: 1 of 64 customers who completed the call did not describe the product as what the record shows**

   1 of 64, 2%; 95% interval 0 to 8%; highest at branch SYN-BR-03: 1 of 11 counted calls (95% interval 2% to 38%), against 0 of 53 at the other branches (95% interval 0% to 7%).

Action	*To be filled in by the policy review*
Owner	*To be filled in by the policy review*
Review date	*To be filled in by the policy review*
Previous period	No previous period

5. **Serious: 1 of 64 customers who completed the call had a product required for the loan with a question over the choice of provider or what the product is**

   1 of 64, 2%; 95% interval 0 to 8%; highest at branch SYN-BR-01: 1 of 12 counted calls (95% interval 1% to 35%), against 0 of 52 at the other branches (95% interval 0% to 7%).

Action	*To be filled in by the policy review*
Owner	*To be filled in by the policy review*
Review date	*To be filled in by the policy review*
Previous period	No previous period

6. **Serious: 1 of 64 customers who completed the call voiced a concern about how the product was sold**

   1 of 64, 2%; 95% interval 0 to 8%; highest at branch SYN-BR-06: 1 of 7 counted calls (95% interval 3% to 51%), against 0 of 57 at the other branches (95% interval 0% to 6%).
